Contents

1 Introduction **4**

2 First-Order Languages **9**
2.1 Preliminary Remarks on Formal Languages 9
2.2 Vocabulary of First-Order Languages 11
2.3 Terms and Formulas of First-Order Languages 14
2.4 Induction over Terms and Formulas 19
2.5 Problem Set 1 22

3 Semantics of First-Order Languages **24**
3.1 Models, Variable Assignments, and Semantic Values 24
3.2 Problem Set 2 32
3.3 Some Important Semantic Concepts 34
3.4 Problem Set 3 39
3.5 Substitution and the Substitution Lemma 41
3.6 Problem Set 4 49

4 A Sequent Calculus for First-Order Predicate Logic **50**
4.1 Preliminary Remarks on the Sequent Calculus 50
4.2 Basic Rules 53
4.3 Rules for Propositional Connectives 54
4.4 Rules for Quantifiers 59
4.5 Rules for Equality 62
4.6 The Soundness Theorem for the Sequent Calculus 65
4.7 Some Important Proof-Theoretic Concepts 66
4.8 Problem Set 5 71

5 The Completeness Theorem and Its Consequences **73**
5.1 The Satisfiability of Maximally Consistent Sets of Formulas with Instances 74
5.2 Extending Consistent Sets of Formulas to Maximally Consistent Sets of Formulas with Instances 82
5.3 Consequences and Applications 89
5.4 Problem Set 6 93

6 The Incompleteness Theorems for Arithmetic 94
6.1 Preliminary Remarks 94
6.2 Formalising "Computer" in Terms of *Register Machine* 96
6.3 Register-Decidability, Register-Enumerability, Register-Computability 100
6.4 The Relationship Between Register-Enumerability and Register-Decidability 106
6.5 First-Order Theories and Axiomatizability 108
6.6 Arithmetical Representability and the Incompleteness Theorems 111

7 Solutions to the Problem Sets 117
7.1 Solutions to Problem Set 1 117
7.2 Solutions to Problem Set 2 122
7.3 Solutions to Problem Set 3 129
7.4 Solutions to Problem Set 4 134
7.5 Solutions to Problem Set 5 138
7.6 Solutions to Problem Set 6 143
